1. Product

Ceremo bag is an impermeable bag produced using a patented functional three-layered film which prevents viral infection by sealing in the infectious substances, including viruses, liquids, blood. It consists of the impermeable inner bag and the outer bag, which is equipped with 8 handles. As it can safely contain a body, even one suspected of infection, the bereaved family is able to see their loved one off without infection risk. Orders may be placed for either the patented impermeable three-layered film, or special requests for an OEM version of a specified size can be made to conform to your country's standards.

* Use of an impermeable body bag is recommended in the Japanese Government Official Guide for Burials.

2. Features

- Inner bag : made from functional three-layered film which effectively cuts off the permeation of infectious diseases including viruses, liquids, blood or oxygen and suppresses putrefaction and odors.
- Outer bag: the WHO guidelines for carrying bags specifies 6 handles, but the Ceremo Bag is equipped with 8 handles for increased stability and ease of use.

3. Users

Government offices (Defense Agency, Fire and Disaster Management Agency, the Police Station), municipalities, hospitals, funeral service companies, etc.

4. Expected Partners

Trading companies and local agencies for handling of funeral and disaster preventive supplies, those having sales channels to the government, municipal offices, hospitals, etc.
